

January 17, 2012

The Swedish American Chamber of Commerce in San Francisco/Silicon Valley are looking for a student to develop a new website in WordPress.

We are looking for a talented student with an eye for creating a professional and simple, but attractive website in WordPress. You have to be self going and ready to work hard to complete the website in the shortest amount of time.

The job is perfect for a part time student, since we want you to work from home with directions on Skype or e-mail. We think the right student has experience from working in WordPress and the proper skills in PHP to create a professional website based on a WordPress standard or custom template.

The Swedish American Chamber of Commerce is a non-profit organization working to promote trade and investments between the U.S and Sweden. We think the right candidate is looking for a fun experience and an opportunity to build and expand your existing portfolio. We do not offer any compensation, but we are more than happy to act as a reference and recommend the student for future career advancements.

If you are interested in the position, please submit your portfolio, or resume and cover letter as soon as possible to emil.steinert@sacc-sf.org .

Regards
Emil
