

Is your organisation prepared to address the sustainability challenge?

“The two MSLS alumni on our international sustainability consulting team are exceptional examples of what we and our clients look for...In this epoch of cascading challenges, we need to develop precisely the type of integrated systems thinkers targeted by BTH, young people who will be prepared to move into the front ranks of business, government and community leadership.”

– Martin Janowitz,
Senior Vice President
Sustainability,
Jacques Whitford Ltd.

Sustainability has become a commonplace term in today’s rapidly advancing world. Is your organisation looking to build internal expertise to understand how you can stay ahead of the curve, avoid future risks, make more strategic decisions, and capture the emerging green market?

Skill Development

The international master’s programme in **Strategic Leadership towards Sustainability** offers a place for skill development in both sustainability and leadership. We teach a unique combination of a science-based framework for strategic sustainable development plus the effective approaches to organisational learning and leadership.

The Network

Successful applicants join a group of colleagues from around the world with a variety of professional and academic backgrounds. They graduate into a highly motivated and supportive global alumni network, and are well prepared to help position their organisations on the cutting edge of the sustainability wave.

Worthwhile Investment

Are you seeking to develop sustainability expertise within your organisation? Please extend this invitation to your employees to join us for a 10-month personal, professional and academic investment with exceptional returns.

Visit our website or contact us at sustainabilitymasters@bth.se to find out how a Master’s degree in **Strategic Leadership towards Sustainability** can help you and your organisation.
