

Are you the next sustainability leader?

“The question of reaching sustainability is not about if we will have enough energy, enough food, or other tangible resources - those we have. The question is:

will there be enough leaders in time?”

Dr. Göran Broman and Dr. Karl-Henrik Robèrt, founders of the Master's in Strategic Leadership towards Sustainability programme

“Professionals in any field will recognize the value of supplementing her or his existing discipline with a solid grounding in sustainability - the MSLS programme at BTH provides just that in a stimulating and fun environment.”

Antoine Belaieff
Canada, Class of 2007

What do an Australian environmental manager, a Brussels lobbyist, a Nigerian engineer, a Brazilian architect, a Canadian graphic designer and a Chinese business manager have in common? They share a concern for the state of the world and a desire to take positive action for the future of our global society. They represent a small sample of the talented and passionate individuals in the international master's programme **Strategic Leadership towards Sustainability**.

The programme offers:

- An intimate and beautiful study location, deemed a UNESCO World Heritage site;
- The scientific foundations plus the practical skills to engage others towards a sustainable society;
- A whole-systems approach to planning and decision making for sustainability;
- Experiential learning from one of the leading nations in sustainability practice (Sweden);
- Interaction with peers from diverse nationalities and professional backgrounds;
- Graduation into an active alumni network; and
- Career paths as sustainability practitioners in business, academia, government and community organizations.

Programme characteristics:

- One academic year (August - June);
- Courses taught in English;
- Access to leading experts in the field of sustainable development;
- Non-traditional teaching and learning approaches; and
- Coaching and assistance from dedicated staff members.
