## SUMMARY

Sophie I. Hallstedt is an associate professor at BTH. In her research from 2008 a foundation for Sustainable Product Development (SPD) was initiated. Since then she has developed the research area together with her colleagues and is now supervising several PhD students. Sophie is leading the research area SPD as one of the prioritized and selected research tracks at BTH. Her research is about how a strategic socio-ecological sustainability perspective can be integrated and implemented on strategic, tactical and operational levels in companies in order to be able to bring forward sustainable solutions. Several methods and approaches have come out from her research which for example, enhance the ability to measure: i) maturity level of sustainability implementation; ii) sustainability consequences of different solutions, and then; iii) quantify and visualize the progress of sustainability implementation. The purpose of her research is to increase the product design teams' ability to make strategic choices and contribute to a more proactive company regarding sustainability issues and make business advantages out of that.

## WORK EXPERIENCE

2015 – present **Associate Professor and Research area leader** for Sustainable Product Development at Dept. of Strategic Sustainable Development, BTH. **Project leader** for “STOSIP” project and one subproject in the Profile project “MD3S”. **Main supervisor** for three PhD-students (Jesko Schulte, Matilda Watz, Carolina Villamil) and **supervisor** for one PhD-student (Patricia Lagun Mesquita). **Examiner and senior lecturer** in Master courses and PhD courses.

2013 – 2015 **Senior Lecturer** and **supervisor** for two PhD-students (Patricia Lagun Mesquita and Rachael Gould) in Sustainable Product Development at Dept. of Strategic Sustainable Development, BTH. **Research area leader** and **project leader** in the Profile project “MD3S”. **Project leader** in the “STOSIP” project. **Examiner and senior lecturer** in Master courses.

2011 – 2013 **Head of Department** and **senior lecturer**. **Supervisor** for two PhD-students (Cecilia Bratt and Rachael Gould) in Strategic Sustainable Development. **Project leader** for “Labelling and Procurement support for Sustainable Product Innovation”. **Post doc** in the Vinnmer project “Sustainability criteria in concept evaluation methodology”.

2008 – 2011 **Senior Lecturer** at the Dept. of Mechanical Engineering, BTH. **Project leader** for the research project “Labelling and Procurement support for Sustainable Product Innovation”. **Supervisor** for two PhD-students (Cecilia Bratt). **Programme Director** and **project leader** for the development project of the Master Programme in “Sustainable Product-Service System Innovation”.

## AREAS OF EXPERTISE

- Sustainable product development
- Sustainability assessments
- Sustainability integration in early product innovation phases
- Strategic Sustainable Development Planning

## LANGUAGES

- Swedish (mother tongue)
- English (fluent)
- German (beginner's level)

## ADDITIONAL EDUCATION

- Pedagogy courses for higher education, BTH, Sweden
- Ph.D. Supervision Course, Linné University, Växjö, Sweden.
- Managing Product Development for Executives, Chalmers Professional Education
- Development- Group- Leader- education, Försvarshögskolan

1997 – 2008	<b>PhD student and lecturer</b> at the Dept. of Mechanical Engineering Development, BTH. Formally registered at the Department of Physical Resource Theory at Chalmers University of Technology. Course development and teaching.
1995 – 1997	<b>Teacher</b> at the Dept. of Mechanical Engineering, <b>Högskolan Karlskrona/Ronneby</b>
1995	<b>Assisting traffic planner</b> at Boverket, Karlskrona
1992	<b>Environmental Engineer</b> at SSAB Tunnplåt, Luleå

## EDUCATION/EXAMS

---

- **Associate Professor (Docent)** in Mechanical Engineering with emphasis on Sustainable Product Development, Blekinge Institute of Technology, Karlskrona, Sweden, 2015.
- **Ph.D.** in Mechanical Engineering with emphasis on Sustainable Product Innovation, Blekinge Institute of Technology, Karlskrona, Sweden, 2008.
- **Licentiate** in Engineering in Environmental Sciences, Chalmers University of Technology, Gothenburg, Sweden, 2001.
- **M.Sc.** in Environmental Planning and Design (Civilingenjör), Luleå University of Technology, Luleå, Sweden, 1994.

## OTHER ENGAGEMENTS AND MEMBERSHIPS

---

- Steering group member for Sustainable Design a Special Interest Group in the Design Society <https://www.designsociety.org>
- Run (together with 2 other researchers) a national PhD course in Sustainability in Engineering Product Development as part of the course Engineering Product Development within the Product Development Academy. <http://www.productdevelopmentacademy.se/2017/09/10/pda-future-workshop-at-design-sciences-lund-university/>

## RECENT PROJECTS

---

2015 – present	<b>Strategic, Tactical and Operational implementation of Sustainability into the Innovation Process – STOSIP.</b> Sophie initiated, applied and leads the STOSIP project. The overall project objective is to support manufacturing companies to integrate and implement sustainability on strategic, tactical and operational levels in the company. Within the project, Sophie has investigated how to guide decisions for down-selection and exploration of emerging technologies and materials from a sustainability and value perspective. Sophie supervises several PhD-students and leads work packages in the project. The project is funded by Knowledge Foundation. <a href="https://www.bth.se/eng/stosip/">https://www.bth.se/eng/stosip/</a>
2013—present	<b>Model Driven Development and Decision Support – MD3S</b> This research profile aims, in co-production mode develop, disseminate, and integrate relevant, user-friendly and efficient support methods and tools for sustainable product-service system innovation. Within the project, Sophie supervises several PhD-students and leads a subproject that aims to integrate sustainability and value in the early innovation phases. The project is funded by Knowledge Foundation. <a href="http://bth-collaboration.se/content/model-driven-development-and-decision-support-md3s">http://bth-collaboration.se/content/model-driven-development-and-decision-support-md3s</a> .
2010-2013	<b>Sustainability criteria in concept evaluation methodology</b> Sophie initiated and applied for a post-doc period of two years. The project objective was to promote the project leader's qualifications, and build up a long-term partnership between BTH and GKN. The research aim was to clarify how to define sustainability features in the early product

	innovation phases and suggest an improved concept design and evaluation methodology, including sustainability aspects during the product life cycle. The project was funded by Vinnova.
2009-2011	<b>Post-doc for Sustainable Product Innovation</b> Sophie initiated and applied for a post-doc period of two years. During this period, she spent some of her working time in industry and at the same time developed her research profile more towards early phases of the product innovation process with the manufacturing industry as target group. The main purpose for this project was also to further develop research in sustainable product development through application and implementation of support tools for Sustainable Product Development. The project was funded by Knowledge Foundation.
2009-2012	<b>Labelling and Procurement Support for Sustainable Product Innovation</b> The main question for this project was a framework for strategic sustainable development that could aid development of criteria and guidelines for sustainability based product labelling and sustainability-based procurement policies. Sophie was the initiator, project leader and supervisor for the PhD student Cecilia Bratt. The project was funded by Knowledge Foundation.
2006-2009	<b>Prioritisation Support for Sustainable Product Development</b> Sophie was one of the researchers initiating and leading the project. Within the project she worked with the main question - how organizational understanding and adoption of a strategic sustainability perspective at senior management level permeate product and process development. The project was funded by Knowledge Foundation.
2005-2008	<b>Effective and Sustainable Waterjet Cutting</b> This project took a multidisciplinary approach that involved fluid dynamics, machine dynamics/virtual prototyping and sustainability assessment as the main and interrelated areas. Within this project Sophie suggested an approach for sustainability-driven design optimization. The project was funded by the Knowledge Foundation.
1998-2000	<b>Tool for Sustainable Product Development and Investment Planning</b> The project which was carried out in collaboration between the Department of Mechanical Engineering, BTH, and the Department of Physical Resource Theory, Chalmers University of Technology and Göteborg University. Within the project Sophie developed a method for sustainable product development. The project was funded by the Swedish National Board for Industrial and Technical Development.
