Profile

Newly graduated civil engineer with many years of work experience in various industries. Personal management, project management, self-employment, service, system design and teacher are some of the experiences that I live through during my working life. Before I passed the master's degree program, I worked in several different industries, my interest in new technology and innovation took me to where I am today. Now I want to use the knowledge that I have accumulated for about 15 years and extend it further.

Competence

- System design
 - Programming (C/C++, Java, JQ, JScript, Python, PHP)
 - Microcontrollers
 - Network, IoT, data base programming, real time applications, WSN-design.
 - Signal processing, sensor system, haptic.
 - PCB design and construction.
 - Mastering different software and OS.
-

Education

2013–2019, I studied Master of science in computer engineering and digital media technology at Blekinge institute of technology.

2000, High school Completed as a plumber technician.

Publications

Master thesis: IDRISOGLU, Alper. Wireless Sensor System for Monitoring Sportsmen Exposed to Hazardous Concussions. 2019.

Working experience

2019–2021 Currently I am working as bus driver at Bergkvarabuss AB and teacher at Blekinge institute of technology in courses measurement technology, electronics with a focus on IoT, control technology and sensor systems.

2014–2019 Beside my ordinary studies, I worked as a bus driver at Bergkvarabuss AB in Karlshamn.

2011–2013 I had my own plumbing company.

2003–2007 I worked as a technician at pharmaceutical company (Abdi Ibrahim) in Istanbul Turkey. I was responsible such as project management and maintenance planning.

2001–2003 I completed military service as a sergeant. I was responsible over 346 vehicle and the staff.

Languages

English: Fluent, verbal and written.

Swedish: Fluent, verbal and written.

Turkish: Advanced, verbal and written. (Mother tongue)
