

CURRICULUM VITAE

Dr Martin Boldt

Date of birth: Born May 5, 1977 in Lund, Sweden.
Address: Blekinge Institute of Technology, 370 79 Karlskrona, Sweden.
E-mail: martin.boldt@bth.se **Mobile:** +46(0)70-5573099

Appointments

2022-present Team leader at Department of Computer Science, BTH.
 2021-2022 Acting deputy head of department, Department of Computer Science, BTH.
 2019-present Associated professor (Docent), Department of Computer Science, BTH.
 2010-2019 Assistant professor, Department of Computer Science, BTH.
 2005-2010 PhD student (50%), School of Computing, BTH.
 2005-2010 Adjunct teacher (50%), School of Computing, BTH.
 2002-2005 Teacher assistant, School of Computing, BTH.
 2001-2002 Software developer at CellPoint Systems, Sweden.

Professional preparation

2005-2010 PhD in Computer Science with emphasis on Information Security, BTH.
 2002-2003 Master in Software Engineering at BTH.
 1998-2001 Bachelor in Software Engineering at BTH.

Theses titles

2010 PhD thesis, "Privacy-Invasive Software"
 2007 Lic. thesis, "Privacy-Invasive Software: Exploring Effects and Countermeasures"
 2003 MSc thesis, "Investigating Spyware in Peer-to-Peer Tools"

Research

My research focuses on data analysis in the domains such as computational criminology, information security and telecom, which are approached using various methods from the interdisciplinary field of data science. Most research is software-related and involves various approaches from applied machine learning and more generally data-science. Together with Swedish law enforcement the research aims to investigate and improve data-driven methods for mitigation of crimes as well as improved clearance rates. The research within the telecom domain focused on anomaly detection and fault prediction in different telecom settings.

Teaching

All in all, I have been involved in teaching at least 15 unique courses on both under-graduate and graduate levels, as well as two Doctoral student courses. Out of these courses I have been course responsible in at least 10 of them. For some of the courses the course material has been created from scratch, while in others I have been responsible for parts of the course material. As I have a background in computer security and since BTH provides two computer security programmes, many of the courses that I have been involved in have been in that field. However, since 2016 much more of my teaching time have been scheduled for supervision and examination of degree projects. Between 2016-2018 I was the examiner for Master's thesis projects in computer science

at BTH. Apart from individual courses, I was the manager for a Bachelor programme in *IT Security* between 2010 – 2012. In 2018 I was assigned as manager for a 5-year programme in *AI and machine learning* which started autumn 2019.

Supervision experience

I'm currently supervising two PhD students as main supervisor. I have previously supervised two doctoral students that have successfully defended their Ph.D. theses. The first doctoral student was Dr Anton Borg who started his doctoral studies in 2009. I was included as a supervisor from the time he received his Licentiate degree in 2012 (approximately half way) until he defended his Ph.D. thesis in 2014. The second doctoral student was Dr Fredrik Erlandsson that I supervised from his start in 2012 until he successfully defended his Ph.D. thesis in 2017. In addition, I have also supervised Khurram Shahzad from the time he received his Licentiate degree in 2013, but he has not yet defended his Ph.D. thesis. He currently has a full-time teaching position at Mittuniversitetet. In addition to doctoral students I have also supervised some 30 successfully defended Master's degree projects.

Commitments of trust

When it comes to commissions of trust commitments I am one of the chairs for the 35th Swedish Artificial Intelligence Society (SAIS'23) annual workshop in Karlskrona. I was also general chair for general chair for the IEEE European Intelligence and Security Informatics Conference (EISIC'18) in 2018 and I'm also a member in various program committees, e.g., International Conference on Machine Learning, Optimization, and Data Science (LOD). As a senior researcher I'm continuously peer-reviewing work for conferences, e.g. International Conference on Machine Learning (ICML), Conference on Neural Information Processing Systems (NIPS) and Conference on Uncertainty in Artificial Intelligence (UAI). When it comes to journals, I continuously review manuscripts submitted to for instance Springer's Knowledge and Information Systems and Elsevier's Expert Systems with Applications.

Review commitments

I'm reviewing for various journals, such as Elsevier's Information sciences and Springer's Frontiers of Computer Science. I'm also a member of the scientific program committee for various conferences and workshops which involves peer-reviewing submitted papers, e.g. for NIPS, ICML, FSDM, ENIC, CSTIM and EISIC.

Project funding obtained

2023-present	~480' € from Swedish Research Council (VR), " <i>Data-driven interdisciplinary methods to combat crime and fear using police CCTV</i> ", applicant together with Malmö Univ. and Univ. of New Haven
2022-present	~220' € from KK Foundation, " <i>Senior lecturer in computer science</i> ", applicant together with Prof. Håkan Grahn
2019-2020	~35' € from Vinnova, " <i>Analysis of patients' incident reports within healthcare using learning algorithms</i> ", applicant together with Blekinge Hospital
2015-2016	~250' € from Vinnova FRÖN, " <i>Increasing efficiency in law enforcement using data science methods</i> ", main applicant and project leader.
2014-2015	~200' € from Regional Council of Blekinge, " <i>Open data and predictive models in law enforcement</i> ", main applicant and project leader.
2012-2014	~660' € from EU's Regional Development Fund, " <i>Computer-based support for improved knowledge of serial crime</i> ", main applicant and project leader.
2008-2011	~180' € from Swedish Internet Infrastructure Foundation, " <i>Secure e-mail amongst malicious software</i> ", main applicant.

Publications

ID	JOURNAL ARTICLES (PEER-REVIEWED)
J16	<u>Martin Boldt</u> , Anton Borg, Selim Ickin, Valentin Kulyk and Jörgen Gustafsson, "Alarm prediction in cellular base stations using data-driven methods", accepted for <i>IEEE Transactions on Network and Service Management</i> , ISI impact factor: 3.878 , 2021
