

Does your sustainability journey need a boost?

We build the capacity of organizations to create sustainable futures

## TAILOR MADE SUSTAINABILITY TRAINING

Our world leading team of sustainability experts, educators and leadership development specialists is here to help build your organisations sustainable future.

For decades, we have worked collaboratively with organisations to design and deliver tailored training programmes in sustainability leadership development and education that help inspire organisational and societal sustainability transformations.

We offer customised educational packages that enable strategic action towards sustainability and promote long term collaboration that develops organisational learning for sustainability.

Example topics include:

- Strategic sustainable development
- Strategic planning for organizational sustainability transitions
- Sustainable product development
- Risk management
- Behaviour change for sustainability
- Social sustainability in product- and service development
- Innovation and collaboration for sustainability
- Leadership education for sustainability

Our programs are flexible in length and format (online, in person, hybrid) and are designed in collaboration to fit your organization, employees and work schedule.

Program participants receive access to cutting edge sustainability knowledge relevant to their industry and tailored support from industry experts. Hands-on and practical learning with content relevant to your organization creates learning that directly benefits you and provides both professional development opportunity tangible sustainability outcomes. Programs can include official university credits.

*"The advice we have received from BTH's sustainability researchers has helped us setting strategic directions and holding out against inertia and resistance in the conservative industry.*

Jonas Kleberg, CEO Soya Group

*The course provided me with absolute clarity on the subject of sustainability. The lessons learnt from this course will prove invaluable for both mine and my company's future.*

Paul Nelms

Business Excellence Systems Manager, Telford Extrusions, UK.

*I am completely blown away by how much I am learning, the commitment and passion from everyone and how well structured everything is.*

Victoria Karlsson, Sustainability Consultant, Sweden

A better world through knowledge, expertise and innovation in digitalisation and sustainability.

The Department of Strategic Sustainable Development (TISU) is situated at the Blekinge Institute of Technology (BTH) in Karlskrona, Sweden.

### TISU's Mission

...is to advance *leadership and innovation* for sustainability through collaborative scientific research and higher education.

We develop methodological support and competence for organizations and individuals all over the world that want to create change for sustainability *systemically, systematically and strategically*.

Our department's core is in Strategic Sustainable Development (SSD). Based on systems thinking, SSD is a science-based, structured approach to working systematically and strategically with the complex sustainability challenge society faces. It is designed to facilitate analysis, planning, decision-making and strategic collaborative action across disciplines and sectors towards sustainability at any scale, in any context. The approach also guides selection, development and a coordinated use of other tools for sustainable development.

### SOME OF OUR PARTNERS:

Based on this core, our department has various **Research Focus Areas:**

- Product-Service Development
- Transport and Energy System Development
- Municipal and Regional Development
- Organizational Learning and change
- Design of Sustainability Leadership Education

The department also hosts the world-renowned Master's Programme in Strategic Leadership towards Sustainability ([www.msls.se](http://www.msls.se)) and educates hundreds of students and professionals every year in strategic sustainable development in various programs as well as run online courses at basic and advanced levels.

*"BTH has gained an excellent international recognition for its support to strategic sustainable development ... has an excellent, uniquely large, incomparable and extraordinary well-established national and international network ... Overall, this is an excellent research group performing excellent results"*

*Independent external team of expert reviewers, 2013*

*"BTH is internationally leading in research on how organizations such as companies and municipalities can work strategically with sustainable development..."*

*Lars-Erik Liljelund, f. CEO, MISTRA*
